

## +以网络连接思维

### 优点

- [永远在线](Always On)的互联网连接
- 成本低廉，即可实现线路保证
- 实现方便，客户可完全调配自端网络
- 保证企业的互联网运作不会中断，避免引致公司在时间和金钱上的损失
- 本地线路接入可靠性100%保证

企业已经将各种核心业务转移到互联网应用平台上，各种业务关键性应用和重要数据都需要一个稳定、安全、可靠的互联网连接。通讯连接问题的出现可能导致企业与分支机构、合作伙伴和供应商之间关键业务无法进行，重要资讯传送中断，甚至丢失，这些潜在威胁都将为企业造成无法估计的损失。

为了给企业提供高质量的数据传输，且具有更安全、更可靠的线路保证，中人新电信推出连通率达到100%的互联网接入服务Premium Internet™，采用不同电信公司的平台，通过在其一网络中安装一条后备线路来保证企业享有24小时无间断的互联网连线服务。在主线路发生故障时，数据流量会自动切换到后备线路上，使您的业务运作不中断，避免任何因互联网中断造成的潜在损失。

### 特色

#### 即时检测

随时检测网络的运营情况，保证线路连通无阻

#### 即时备份

对数据传输线路即时备份，保证数据在传输过程中的不间断性

#### 即时切换

在原数据线路有问题时，自动切换到备份线路

+ *Connecting minds. Connecting business*

### *Benefits*

- Maintaining a "real" always-on Internet Connection
- Cost-effective and various backup solution options catering for different business needs
- Peace-of-Mind technology, customers can easily access and manage client side network
- Business protected against service downtime and consequent loss in revenue and staff productivity
- 100% services uptime guaranteed by our Service Level Agreement

All businesses rely on the power, speed and efficiency of the Internet to stay competitive in the ever-changing digital era. Any kind of interruption can cause costly loss of communication with branch offices, partners and suppliers, perhaps resulting in the loss of sales from online purchase. Access to real-time information on sales and inventory, and connection to other applications and services are also jeopardized, reducing efficiency and stifling staff productivity.

ZR's Premium Internet™ is the answer to moving your Internet availability beyond a mere "best-efforts" mode. The solution is designed on a telco-independent infrastructure basis enabling businesses to enjoy trouble-free Internet access by deploying a redundant link in their network. In the case of primary line failure, data traffic is automatically switched to this backup line, protecting the business against downtime and consequent loss of revenue and productivity. With ZR's backup technology for our seamless commercial broadband service, businesses can now enjoy affordable, continuous high-speed Internet Connection.

### *Features*

- Real-time monitoring network status
- Automatic switching function to redundant line when primary line failure is detected
- Continuous protection from Internet outage
