

+以网络连接思维

优点

- 享有我们为您提供的7X24小时技术支持
- 充分利用用户自有Internet线路访问国内资源的优势
- 自动判断，快速访问跨域网络
- 高效，节省成本
- 我们成熟稳定的网络基础，经验丰富的工程师不断的对新技术的研究，这些都保证您可以一直享受到最新的技术方案和世界级的服务

中国Internet用户，特别是位于中国南北不同区域的境内、境外企业，都会面临着南北互通，和与其他地域跨域互联互通的问题。这些挑战给企业跨地域的互联网和关键业务的应用造成很大的影响。

中人新电信推出智能多线接入Split Transit解决方案，有效地解决了企业面临的南北互通和其他跨域网络应用问题。它保证原接入线路的网络利用率。我们独有的智能互联技术为保障，使本地和外域访问分流，直接快速，不占用过多的带宽，访问更加迅捷。彻底解决南北电信互通，和与其他地域跨域互联互通的问题。

特色

- 高速访问CT、CNC及跨域互联网
- 不受限于服务供应商
- CPE由中人新电信提供，安装部署快速方便

+ *Connecting minds. Connecting business*

Benefits

- Provide 24x7 technical support services with prompt response to urgent inquiries and consultations
- **Bandwidth Optimization:** Fully utilize current local network connection with its advantage to access local internet resources
- **Intelligence Connection** Auto-detection, the speed to cross-border network
- **Efficient & Cost-effective**
- **Latest technology:** Building on the mature, robust and stable network to ensure the intelligence connection solution remains a world class service

The internet users in China Mainland, always face lots of problems originating from interconnection between Telco. Those challenges cause enterprises can not fully take advantage on Internet investment and harm its enterprise application and mission critical data transmission.

ZR's Split Transit internet solution effectively solve the interconnection and cross-border Internet communication problems. It optimizes customer current network resources. Adopting our leading intelligence connection technology, local and x-border access intelligence routing make internet access more efficient without bandwidth overloaded, eventually help enterprises winning competitive advantages.

Features

- High speed access to CT, CNC and overseas internet
- Service Provider Independent
- Fast Deployment by using ZR CPE
